PROBLEM NAIL SPECIALISTS

Here at Bodylines, we specialise in the treatment of problem nails. Over the years, we have encountered lots of different nail problems, and we have had success with many of them.

Recovery Program- This consists of an initial consultation, followed by weekly mini manicures for a period of between four and twelve weeks, depending on severity of problem. There are a number of products that we can use to enable nails to recover.

Severe Dehydration - It can sometimes be a mistake to try something stronger. We would recommend our "recovery programme" until the nails showed enough improvement to move them onto something else.

Bitten Nails - This is a difficult habit to break. People do notice your hands and nails and it can really boost someone's confidence if their usually bitten nails are more presentable. The treatment plan will depend on the severity of the nails.

Psoriasis- This disorder can sometimes affect the nail bed and plate. It makes the nail grow in a distorted manner with pitting and extreme ridges. After consultation and observation, a treatment plan will be suggested.

Toenail Rebuilding and Diagnostic Pedicure - Sometimes feet need a little help to look and feel great. An average salon pedicure is fine for average feet. This is why we offer an Advanced Pedicure alongside our traditional pedicures.

For a number of reasons, some people do not have a toenail or they have a damaged toenail. Whether because of previous fungal infections, or loss of all or part of the toenail through injury, surgery or exercise. Following a consultation, we can rebuild your toenail.

If you suffer from any problem with your nails, give us a call and we will be glad to help you find a solution.

Everyone deserves lovely nails; we can give them to you!
